

180-DAY ORDER

Pursuant to Bloomington Municipal Code § 15.08.040 I hereby issue this 180-Day Order, the details of which are described in detail below, for the following reason(s):

- To make and enforce temporary regulations;
- To make and enforce experimental regulations;
- To make and enforce regulations necessary to deal with emergencies; and/or
- To make and enforce regulations necessary to deal with special conditions.

In the fall of 2021, all-way stop control was removed from the intersection of 7th Street and Dunn Street in coordination with the multimodal 7-Line project. In the new configuration, 7th Street is free-flow and only Dunn Street has a stop sign. This Request originated from a review of crash data along the corridor and a 7-Line project status report that was requested by the City's Bicycle & Pedestrian Safety Commission, Traffic Commission, and other community members. The crash data for the intersection of 7th Street and Dunn Street shows a significant increase in intersection related crashes that are susceptible to correction with the installation of all-way stop control. In order to reduce crash risk at this intersection, it will be converted back to all-way stop control. Implementation of this change requires installation of appropriate pavement markings and signs. This proposed change was supported by the Bicycle & Pedestrian Safety Commission and Traffic Commission at their March 2023 meetings. After careful review and consideration the Request has been granted and the following actions will be implemented:

Install all-way stop control at the intersection of 7th Street and Dunn Street.

Questions regarding this Order shall be directed to the City Engineer.

Signature of City Engineer
