non-contiguity of districts in map 4?

Hi Dave,

We're reaching out to the city's GIS folks to confirm VB 02 isn't connected to itself, but if it's not, my take is VB 02 and Perry 29 should be included in the same district to ensure compliance with the contiguity requirements. I plan to point this out to commissioners once I hear back from GIS staff.

Thanks for the thoughtful discussion on the topic, I appreciate it.

Best,
Stephen
