SUMMIT DISTRICT PUD: PETITIONER'S STATEMENT

A. Project: Description of Character:

Summit District PUD is a proposed multi-phased development that encompasses planning for 138.51 acres of unimproved land located in the southwest quadrant of the municipal boundaries of the City of Bloomington. The property is currently in a zoned planned unit development with a small southern portion in the R2 zoning district. The current zoning designations have not been fully implemented over the course of nearly twenty years, and upon examination, the current zoning is insufficient to achieve the overall vision and planning goals for this property. Since the initial creation of the PUD in the 1990's, there have been significant changes in the need for housing, the availability of infrastructure and the comprehensive goals of the City for residential and mixed use development. Previously anticipated infrastructure has not taken place which thwarted the potential development of this site. Instead of amending the existing PUD, the most effective approach is to wholly redesign the development plan for the undeveloped portion and propose a new PUD to meet current and future planning objectives, consistent with the City's Comprehensive Plan, Transportation Plan and related policy and vision documents.

The Summit District PUD presents new and imaginative concepts in urban design and land use development over a broad area. The PUD is crafted to promote and improve the health-safety, and general welfare of the residents of the City and to create distinct developments with unique urban design, mixed uses, enhanced ecosystems, and substantial benefit to the City that would not otherwise result from the general application of the UDO. Summit District PUD will accommodate innovative development layouts and preserve and enhance the natural, environmental, and scenic features of the site and will further address challenges presented by specific site conditions within the Summit District. A total of 53 acres of land will be preserved as parks and open spaces, which will include conservation areas, tree preservation, park space, water and drainage areas, karst features and trails – all enhancing the natural attributes.

The Summit District PUD faithfully meets all requirements of the UDO, as more fully set forth below, and provides for a longer-term development effort to create various types of residential housing, with specifically designed intensity and density of development, coupled with supportive services, commercial opportunities and a resultant series of neighborhood concepts to promote quality of life and place within the City. The PUD will provide a minimum of 15% affordable housing, promote homeownership and offer incentives to increase the percentage of needed affordable housing. The PUD reflects the vision, objectives and policies of the City's

Comprehensive Plan adopted in 2018. In particular, the Comprehensive Plan objectives aimed toward the Environment, Housing & Neighborhoods, Transportation, and Land Use are all included in the overall plan and design of Summit District.

Summit District will offer a wide variety of quality housing options, including much-needed affordable and workforce housing that will also promote homeownership. The PUD will further the City’s stated policies for land use as articulated in the Comprehensive Plan, which include:

- (1) Neighborhood focal points, gateways and urban centers with accessible public and private services (e.g. transit, police, fire, sewer/water, telecommunication, modern utilities)
- (2) Linkages to neighborhood destinations to promote a “20 minute neighborhood metric”
- (3) Respect and enhance environmental assets and natural features
- (4) Promote innovative architectural design strategies
- (5) Develop connectivity in neighborhoods with street, bike & pedestrian pathways
- (6) Support incentive programs to increase owner-occupancy and affordability
- (7) A diverse mix of housing types and densities including small-scale commercial complements

Summit District PUD is designed to create a new identity for use of this land and the natural attributes of the property. The development principles include mixed-use, green building, grid circulation, appropriate densities, housing diversity, including workforce/affordable housing and commercial/employment development within higher-density areas within the property. Access and connectivity are thoughtfully designed to create roadways, pathways and connections to the areas within the PUD as well as adjacent amenities and services. The City’s Transportation Plan envisions both north-south and east-west connectivity at this location, which are included in the overall development plan of the PUD. The plan includes appropriate connectivity to adjacent off-site areas to further the City’s vision within the municipal boundaries.

B. Property and Plan

Sudbury Development Partners, LLC acquired the 138.51-acre tract of land on February 6, 2023 with the express purpose of creating development on property that has been idle for many years in spite of prior planning efforts. A legal description of the land and survey is included here to define the area legally forming the zoning district. Mapping included in the PUD separates the nearly 140 acres into distinct areas for development. The PUD sets forth five areas of development, with sub-areas designated for refined and targeted zoning consideration. Given the massive size of the Property, the planning and development period is expected to take place over a period of at least ten (10) years. Based on the availability of existing infrastructure and connections, including utility and roadways, the development is anticipated to begin along the south and west boundaries of the property, to the north and east side of the property; then south and to the west. Each separate development project (smaller parcels with street frontage and access as planned) will necessarily result in subdivision of the Property with platting and site plans submitted by individual development parcel. The development process will be necessarily require the City’s participation

through defining utility capacity and expansion opportunities, as well as developing funding sources, including tax incremental financing, to support road and related infrastructure completions through a separate understanding between the petitioner and the City.

Affordability and sustainability, along with the incentives available for each will accompany development plans submitted to achieve goals articulated in this ordinance. A minimum of 15% of the residential housing offered by this Project will fall in the affordable category and be income-limited, as provided by the UDO. Units will be designated as affordable to meet the requirement and to provide diversity in housing types and affordable units across the entire project. The entire project will achieve the minimum 15% dedication of affordable residential housing and integrated over the entire Property by development area and sub-area, as further described in the PUD. This integration of this housing requirement across the entire scope of the development will ensure that there is no single concentration of affordable housing in a defined area, but that it is appropriately disbursed throughout the Property. The calculation for each development project will be carried forward from area-to-area such that the aggregate housing dedicated to affordability will total a minimum of 15%, thereby meeting and likely exceeding the PUD requirement for affordability. Some incentives will require an increase of affordability to a minimum of 20%.

Each separate development area within the PUD will necessarily result in further subdivision of the property, with platting and site plans submitted by individual development parcels moving forward. As parcels are planned for development, other participants will accept ownership of tracts through a subdivision process to develop to specific uses and purposes as defined by the PUD.

C. Qualifying Standards (UDO: Section 20.02.040)

- (1) The PUD zoning district is 138.51 acres, well more than the 5-acre minimum requirement.
- (2) The PUD zoning district is not within the Mixed-Use Downtown (MD) zoning district, prohibited by the UDO.
 - (3) A minimum of 15% of the proposed dwelling units will be permanently income-limited through deed restriction to households earning less than 120 percent of the HUD AMI for Monroe County, Indiana and the development will be subject to the applicable standards of Subsection 04.04.110(c) Affordable Housing.
- (4) Summit District PUD would not be feasible through the conventional zoning regulations and standards found in the UDO and is best served by a planned unit development ordinance. Given the massive scale development of the singularly owned and un-subdivided parcel, a broader planning approach is critical to the orderly development of the land and implementation of the overall vision for housing and complementary services and commercial activity. The PUD is optimal to meet the objectives of the Comprehensive Plan and Transportation Plan adopted by the City.
- (5) Summit District land is singularly owned by Sudbury Development Partners, LLC under Deed Record, Instrument No 2023001200, recorded with the Recorder of Monroe County, Indiana on the 6th day of February 2023.
- (6) Summit District is protective of highly-valued design features that include specific

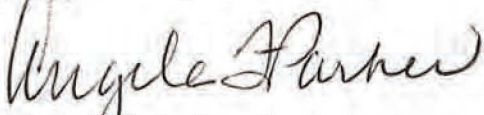

natural, environmental and scenic resources and green spaces as well as retaining natural landforms throughout the development, including:

- a. Protecting the natural features through inventive design that consider the natural characteristics of the site;
 - b. Retaining the natural landforms to the extent possible while designing residential densities to meet the needs of the community;
 - c. Designing low impact design in areas of sensitivity and more intense development where appropriate; and
 - d. Utilizing green incentive and passive energy design strategies, where feasible.
- (7) Summit District is designed in a manner that no block perimeter will exceed 1400 feet, it will retain and introduce greenspace, trails, pedestrian and bike paths as well as open spaces, incorporating the following factors:
- a. Connectivity to promote pedestrian, public transportation and the “20-minute neighborhood” concept;
 - b. Design of Summit Center to adequately support the neighborhood and larger community;
 - c. Connectivity to the existing and planned infrastructure as prescribed in the Comprehensive and Transportation Plans adopted by the City; and
 - d. Designs that promote and support the use of renewable energy.

LAND DESCRIPTIONS

Warranty Deed - Joe Home Construction LLC Instrument No. 2017012123 Dated 08/31/2017 Monroe County, Indiana Recorder

The land described below is one and the same as that described in Monroe County Land File Co. No. 884 116(P) as an issuing agent for Chicago Title Insurance Company, Commitment No. 51855 dated January 10, 2003.

TRACT 1

A part of the East half of Section 7 Township 8 North Range 1 West, Monroe County, Indiana, more particularly described as follows:
